VISES AND ANVILS

Vises

Ridgid Peddinghaus Matador and Superior vises feature a rugged all steel, drop forged construction with hardened surfaces, a large anvil and measuring scale. The Matador has a patented adjustable guide guaranteeing precision parallel clamping even after years of service. The double acme thread screw allows faster adjustment of jaw width. The Matador is equipped with fixtures for snap-on jaws for various applications. Superior models are equipped with fixed pipe jaws, making them ideal for plumbers, and a detachable front jaw ; a safeguard against theft, especially when being used in building sites. A full range of accessories is available including : 360° swivel base, bench clamping screw, automatic and mechanical elevators and jaws.
